SAMU - Rwanda Biomedical Centre

SAMU Roster

User manual

For the Call Center Team Leader

About this manual

This manual explains what the Call Center Team Leader does in SAMU Roster: building the dispatch desk rotation and reviewing it.

In this manual

1. Your role
2. Signing in and getting around
3. Generating the dispatch desk rotation
4. How a roster moves from draft to published
5. Reviewing your part
6. Reading the roster board
7. If something goes wrong

Version 1 - 24 October 2026 - This manual covers only what this role does.

Your role

As **Call Center Team Leader** you build the **dispatch desk rotation**: who covers the Regulation desk on each day and night shift. Drivers and ambulance crews are not touched by what you do, and events never affect the call centre roster.

You can	You cannot
Generate and regenerate the dispatch desk rotation	Generate drivers or medical crews
See the roster board for your own staff	See or edit other teams' staff
Check conflicts and submit a roster for review	Publish a roster (administrator)
Read your notifications	Use Crew Rollup, Events or Command Decisions

Your menu

Dashboard, Generate Roster, Roster Board and Notifications.

Signing in and getting around

1. Open **https://ems-rw.duckdns.org** in a browser on a computer or phone.
2. Type your **username** and **password** exactly as given to you. The username is case sensitive and can contain a space.
3. Press **Sign in**.

> **IMPORTANT** After **5 wrong passwords** for the same username, sign-in is blocked for 15 minutes. You stay signed in for 12 hours, then you sign in again. There is no way to change your own password in the app: ask the administrator to set a new one.

On a phone

- Tap the **menu button** (three lines, top right). Groups with an arrow open when you tap them; tap a page and the menu closes.
- Lists appear as cards, one per person or record, with their buttons underneath. The roster grid scrolls sideways: swipe it.

Signing out and this manual

Log out and **User manual** are at the bottom of the menu, below your name. The manual you open is always the one for your role.

Generating the dispatch desk rotation

1. Open **Generate Roster**. The page says *Generates the dispatch desk's coverage rotation only.*
2. Choose the **Range** (Day, Week, Month or Custom range) and the **Reference date**, then press **Generate roster**.
3. Wait. The page shows elapsed time. You can keep it open or return later.
4. The result reports any shift where the desk could not be fully covered.

- The system aims for **2 of your own staff** on the Regulation desk for every day shift and every night shift. The medical team's specialists top the desk up to its full headcount; that is arranged by the PHTL.
- Fairness is measured as shifts and hours over the whole month. A day shift counts as 10 hours and a night shift as 14.
- Leave entered by the administrator is respected. After a night shift the next day is a day off, and nobody works more than 2 days in a row.
- If a roster already exists for exactly the same dates, your rotation is added to it. **Regenerate** recomputes only the dispatch desk.

How a roster moves from draft to published

Stage	What it means	Who acts
Draft	Being built. The three parts (drivers, medical crew, dispatch desk) can each be generated into the same draft.	You, the other managers and the administrator
Submitted	Sent for review. It is locked: nobody can generate into it.	Anyone signed in (you can submit when your part is done)
Published	Final. Every person in it is notified. Later changes go through crew replacements, which notify the people affected.	Administrator only

Check conflicts on the Roster Board lists anything that would block publishing: a missing rest day, a person scheduled while inactive, a night shift for someone not cleared for nights, a leave day that was overridden, a crew with no Pro, or an ambulance that is not in service. Each line says how to fix it.

Reviewing your part

1. Open **Roster Board** and choose the roster. You see your own staff only. The Regulation desk shows as **DR** (day) and **NR** (night).
2. Press **Check conflicts** and fix anything under **Can't publish**. If a person must change, ask the administrator.
3. When your part is ready, press **Submit for review**. The administrator publishes.
4. **Notifications** shows the message sent when the roster is published. Press **Mark read**.

Reading the roster board

The board has one row per person and one column per day. Each cell holds a code. Colours: blue-tinted cells are day shifts, dark cells are night shifts, grey cells are days off, amber cells are leave or other absence, green cells are event duty.

Code	Meaning
D + number (D3)	Day shift at the station with that code
N + number (N3)	Night shift at the station with that code
DR / NR	Day / night shift at the Regulation desk (call centre desk)
DE / NE	Day / night event duty
O	Off
AL, SL, ML, PL	Annual leave, sick leave, maternity leave, paternity leave
TR, AD, P	Training, administration, permission
MS, ST, CY, CL	Mission, stock, cyclism, circumstance leave
DT, DM, DC, R	Data, day meeting, day checking, roster
SB	Standby

For fairness, a day shift counts as **10 hours** and a night shift as **14 hours**. The total on the right of each row is hours worked in the roster.

Rules the system applies when it builds a roster

- One shift per person per day. Leave is respected exactly as entered.
- The day after a night shift is a day off. A day shift is never placed directly before a night shift.
- No more than **2 working days in a row**. Rest and run-length rules also continue across the border between two rosters.
- People marked as unable to work nights never get night shifts.
- Anesthesiologists and critical-care staff work only at the four middle-site stations and are the only people the Regulation desk draws from the medical team.
- Every crew should have at least one Pro. If people are short, the system fills what it can and reports the gap; it never refuses to build a roster.
- Hours are balanced fairly across the whole calendar month, not only inside one roster.

If something goes wrong

What you see	What to do
Sign-in is refused	Check the username (capital letters, spaces) and password. After 5 wrong tries, wait 15 minutes.
'Session expired - please log in again'	You were signed in for more than 12 hours. Sign in again.
'Waiting for another generation to finish'	Only one roster is built at a time. Keep the page open or come back later.
Generation seems to take very long	A full roster takes about 10 to 15 minutes. If the page was closed or the system restarted, start it again.
'No active call_and_dispatch employees on file yet'	Ask the administrator to add your staff with the call and dispatch role and a facility posting.
A desk shift shows fewer than 2 people	Not enough staff were free that shift (leave or rest days). Ask the administrator or the PHTL for cover.
Anything else	Tell the administrator the screen name, what you pressed and the exact message.
